ANOTHER "INNOVATIVE FIRST" FROM KARMA

The Karma Whip-Master powder base dispenser is designed for serving customer-pleasing, problem-free whipped and frothed hot chocolate. At the push of a button, the continuous flow operation will fill any cup size. A timed dispense is available upon request. The compact design and versatility of the water source (water line connected or portable) make it an excellent choice for any application. In the portable operation, the water tank capacity can be expanded with the use of a three gallon water bottle kit.

The Model 353, two product version, has the same compact foot print as the Model 352 single flavor dispenser. With the dual mixing system on the Model 353, a variety of customer-pleasing hot beverages can be served with no cross over of flavors. Regular and lite hot chocolate, hot chocolate and cappuccino or hot chocolate and flavored coffee are a few of the combinations that can be served.
