ANOTHER KARMA "ORIGINAL"

The simplistic operation of the Models 652 and 653 II make them the most user friendly freeze dried coffee dispensers available. At the push of a button, the continuous flow will fill any cup size; however, a timed dispense is available upon request. The compact design and versatility of being waterline connected or portable make it an excellent choice for any application. In the portable operation, the water tank can be expanded with the use of a three gallon water bottle kit.

The added feature of a hot water tap, located on the front of the machine, is an added bonus to these models. The water draws directly from the tank which prevents the chance of flavor interaction. It's good for single packets of soups, tea bags or hot chocolate.

The Model 653 II, two product version, has the same compact design as the 652, single version, however, its dual mixing system prevents crossover of flavors from one product hopper to the other. With today's flavored coffees, the dual hopper system is the choice of the industry.

SPECIFICATIONS

ELECTRICAL/HEATER ON:

MODEL 652/line connected	120V	60Hz	1260watts
	240V	50/60Hz	2360watts
Model 652/portable	120V	60Hz	1250watts
	240V	50/60Hz	2350watts
Model 653 II/line connected	120V	60Hz	1360watts
	240V	50/60Hz	2460watts
