KARMA - OVERCOMING THE DEMANDS OF THE BEVERAGE IND.

* The overwhelming demand for heavy duty, high volume cappuccino dispensers has prompted the introduction of Karma's new Cafe Matic 456XV machine. This extra volume dispenser is helping to overcome the high demand for today's expanding cappuccino market.

* Independent whipping systems for each hopper help to prevent the chance for flavor interaction. The Model 456XV serves a variety of drinks including hot and iced cappuccino, hot chocolate, hot cider, and other powdered beverages. The tremendous versatility of this machine keeps customers coming back for more.

* The Model 456XV is designed for high drink volume applications where a higher hopper capacity is needed. This heavy duty, extra volume model has an 8 lb. hopper delivering 160 / 6 oz servings, a 3 lb hopper delivering 60 / 6 oz serving and a 5 lb hopper delivering 100 / 6 oz servings between reloads. Making it the highest volume three flavor cappuccino dispenser on the market.

* The versatility of running this dispenser by either a waterline or portable allows the operator to serve the product wherever a 120 volt electrical outlet is available. A simple "flip of the switch" converts the dispenser to portable fill.

* The Model 456XV, heavy duty three product cappuccino dispenser is destined to be successful, serving three hot, three iced or one iced and two hot beverages. When serving two hot and one iced beverage, a waterline connection is necessary.
