SLIM TEA MASTER III MODEL 875S

For use with one-gallon jug or bag-in-box

The Model 875S utilizes venturi mixing valve to mix the tea syrup with water. A built-in water pressure regulator ensures that the proper amounts of syrup and water are mixed. This built-in pressure regulator is factory adjusted for a static pressure of 18 pounds. Increasing or decreasing the drink strength setting can be easily performed in the field.

To operate, simply pull the faucet handle open until the desired amount of tea is dispensed. The faucet can also be locked open for dispensing pitchers and other large containers.
